

**ON JANUARY 10TH,
AT MACWORLD EXPO/SAN FRANCISCO,
CANVAS™ 3.0 WILL BE UNVEILED.
PLUNGING THE COMPETITION
INTO UNPLANNED OBSOLESCENCE.**

In accordance with the wish-list of thousands of professional Canvas users and reviewers, we proudly announce the release of Canvas 3.0. The most complete precision drawing program ever. • With new high-end text handling features like full kerning control, tabbing, binding to curves, and conversion of Postscript® Type 1 fonts to Bezier outlines. •

Enhanced color capabilities, including powerful built-in separator, PANTONE® support, and automatic blended fills. • Unparalleled Bezier curve editing power, from multi-point selection and manipulation to automatic object blending and object conversion. •

New CAD features, including user-definable hatching and parallel lines or curves, dashed lines on any shape, combinable/dividable objects, and a smart mouse assistant. • Import/export of all critical formats, including Postscript® IGES and DXF. Plus

Deneba's Open Architecture technology, which allows new tools, effects and filters to be added with ease at any time. • Sure. There are other programs out there to choose from. Problem is, they tend to either cost twice as much. Or do half as much. Or both. • Canvas 3.0. The new line has been drawn. • For more information or the name of your nearest dealer, call (305) 594-6965 or FAX (305) 477-5794.

CANVAS 3.0™

PRECISION DRAWING POWER FROM
Deneba SOFTWARE

All illustrations were created in Canvas and separated by the Canvas Separator.™
